Freshwater Biodiversity in Asia: With Special Reference to

species of freshwater fish reported to be found in Peninsular Malaysia O. Besides a record of the fishes found in the Pahang River basin, other relevant information such as the fisheries and problems faced in conservation of habitats is presented to the reader. Most notable is the new record for Peninsular Malaysia of *Ompok eugeneiatus*.

Freshwater Biodiversity in Asia with special reference to

PDF | Current international agreements and World Bank policies support actions to consider and conserve freshwater biodiversity, which has received far less attention than biodiversity in terrestrial and marine ecosystems.

(PDF) Freshwater biodiversity in Asia with special

Freshwater biodiversity is facing unprecedented levels of threat. Through The River Bank we aim to raise awareness about these delicate ecosystems and raise the necessary funds to put more freshwater species on the map, leading to conservation action on the ground.

Freshwater biodiversity | IUCN

The purpose of this report is to give attention to Asian freshwater biodiversity. Asia is home to some 3500 species of fishes, hundreds of other organisms which spend their entire lives in water, and to many types of freshwater habitats. Many of these are of considerable economic values and are an important source of food for many poor people.

Asia-Pacific Biodiversity Observation Network Aquatic

Freshwater ecosystems in Asia are under grave threat. Large and growing human populations and the rapid pace of development have led to the degradation of natural environments throughout the region. Conservation of freshwater biodiversity faces particular challenges because of a lack of public awareness of its magnitude and importance.

Conservation of freshwater biodiversity in Oriental Asia

* Asia is home to some 3500 species of fish, * The countries of Asia differ in their national hundreds of other organisms which spend capacity and expertise in freshwater biodiver-

freshwater includes rivers, lakes and wetlands and are habitats which are rich in biodiversity. such systems provide us with many services such as our drinking water, food (such as fish), a means of transport as well as recreational opportunities.

David Coates and Jacquie Grekin, CBD

Aspects on biodiversity and conservation of the ichthyofauna in the Asian region, in comparison to that of Africa, Europe and North America have been relatively less documented. This paper attempts to evaluate the above aspects in the East, and South and Southeast Asia based on available information in the literature.
