The Galapagos' population has increased from roughly 3,000 in the 1960s to about 30,000 in 2012. Four of the islands are inhabited, with most people living on Santa Cruz and San Cristóbal. The nature of the Galapagos provides livelihoods based on tourism, fisheries, and commerce.

The Galapagos Islands | Places | WWF

The most northerly member of its family, the Galapagos Penguin is endemic to the Galapagos archipelago, 1000 km off the coast of Ecuador. With a distribution that virtually straddles the equator, the Galapagos Penguin is able to survive at such a tropical latitude due to the cool, nutrient-rich waters of the Cromwell and Humboldt currents.
